## About This Game

"The challenge was to design and build an electric vehicle that's distinctively and unmistakably a Jaguar – a vehicle that will demonstrate that an electric vehicle can be a driver's car and excite the senses." - Ian Callum, Jaguar Director of Design

Discover Jaguar I-PACE Concept – a preview of our first all-electric performance SUV - in a fully interactive Virtual Reality experience. HTC Vive customers can now explore the design and engineering stories behind I-PACE Concept through a blend of cinematics and immersive room-scale VR technology.

Representing the next generation of battery electric vehicles, I-PACE Concept is the future that drivers can look forward to, and a striking glimpse of Jaguars to come. Marrying a bold, future-facing design with a supercar silhouette, I-PACE Concept combines the renowned Jaguar performance and legendary refinement you'd expect to deliver a truly engaged, exhilarating drive. With a range of more than 500km on a single charge (NEDC cycle) and true sports car acceleration - reaching 100km/h in around 4 seconds - I-PACE Concept will prove that a zero emissions vehicle can still be a true driver's car.

This app is the first version of the Jaguar I-PACE Concept Virtual Reality Experience for Steam. Please note that the app is only supported on Win10 and nVidia GTX 1080. All rights relating to the Jaguar I-PACE Concept content and technologies contained within this app (including applicable patents) are owned by Jaguar Land Rover Limited.
